Looking for a fun craft to catch the beauty of the sun?
Look no further

The key to creating these pretty sun catchers is the oil. Applying oil to paper creates more of a translucent look with the paper so the sun light can shine through the art design.

Materials:

- Colored art page or coloring page – printed on basic white printer paper
- Mason jar lids (Wide Mouth Mason Jar Bands)
- Oil – olive oil, but any kind of oil should work
- Cotton balls
- Scissors
- Twine
- Glue
- Paper towel – to protect work area and absorb excess oil

Instructions

1. Use a cotton ball to apply oil to your colouring sheet, after you have colouring in the design as you like it. Make sure to cover all the paper. You don't have to drench the paper, just cover completely. Dab excess oil up with a paper towel or tissue and allow to dry for about 5 minutes.
2. Using the mason jar lid, trace a circle around the art and then cut the circle, inside the line so the art fits inside the mason lid.
3. Apply a little bit of glue inside the lid and place the art in the lid, art side facing outward.
4. Wrap twine around the lid, tie a knot to hold in place. Leave at least 4" of twine and tie a knot at the top so you can hang your sun catcher.
5. That's it!

Share your finished Suncatcher with us in our Facebook group. We can't wait to see your finished suncatchers!
