

WHERE DOES OUR WOOD COME FROM?

ReForest London
planting the future today

** adapted from Forests Ontario "Weird Wood"

Name: _____

Date: _____

Think about the items in your home and where they may have come from. Can you identify which ones started their lives as trees?

Which tree items do we use on in our daily lives? How much do we NEED these items? Do you think there are man-made items that could replace tree products?

Instructions:

Read about various trees and the types of materials we use them for. Then, try to match the tree to the product on the worksheet on page 4.
